

Vacancy
Senior Engineer - Spectrum Management and Monitoring
(1 Position)

The National Communications Authority (ANC) of Timor-Leste is seeking an experienced and energetic technical professional in the following position:

Senior Engineer - Spectrum Management and Monitoring

This vacancy is open to both National and International applicants.

The senior engineer is to serve a line function within the ANC that includes spectrum planning, licensing and monitoring as well as to support the team on other technical issues on the above mentioned tasks.

The senior engineer should have at least 5 years work experience at manager/consultant level and have qualification and a detailed working knowledge of the subject matter in the respective field.

Contract Arrangements

The position will be offered as a 6- to 12- month contract to begin in March 2016. Further extension may be offered subject to conditions. The successful applicant will work at the ANC office in Dili Timor-Leste. If needed, visa assistance will be provided. Remuneration is to be negotiated. Applicant is invited to indicate salary expectation. The ANC will provide office space, use of personal computer and general office supplies, required for the position.

Key Responsibilities and Duties

The Senior Engineer will provide a range of services to the ANC that includes spectrum planning, licensing and monitoring as well as to support the organization on other technical issues including but not limited to the following:

1. Support the Technical Director for Sector Regulation in developing and implementing policy plans and regulatory instruments;
2. Work with the spectrum engineers in radio spectrum planning and licensing;
3. Work with the spectrum engineers in radio spectrum monitoring;
4. Support and guide the junior engineers in tracking and resolving interference and other issues;
5. Support and guide the spectrum engineers in detecting and identifying illegal transmitters;
6. Support the use of performance measurement equipment and the operation of a special-purpose monitoring vehicle;
7. To contribute in policy and regulation matters to ensure an improved regulatory dispensation for the ANC.

Applications

Applicants should submit: (1) a letter discussing their suitability, (2) a curriculum vitae and (3) any relevant documents.

All applications must be presented as pdf documents and be submitted by email to: jobs@anc.tl. Subject: Senior Engineer – Spectrum Management and Monitoring

Applications close on 12 February 2016.
